14.30	<i>Osteotomies and Bone Reshaping: A new breakthrough in technology and a paradigm shift in design</i>	<u>Olivier Gerbault</u>
15.00	<i>How I currently use rib in secondary <u>rhinoplasty</u></i>	<u>Wolfgang Gubisch</u>
15.30	<i>Managing the deviated nose, the role of septal surgery</i>	<u>Hossam Foda</u>

PART 2

08.00-17.00 RHINOPLASTY DISSECTIONS (FRESH FROZEN CADAVERS)

We will run an international masterclass dissection led by Dr Olivier Gerbault and Bahman Guyuron on using the piezo ultrasound osteotomes for osteotomies and bony reduction

We will run an international masterclass led by Charles East on the technique for reducing the dorsum under direct endoscopic visualisation

Wolfgang Gubish (Stuttgart, Germany) and Enrico Robotti (Bergamo, Italy) will demonstrate a method of open top Rhinoplasty and Hossam Foda (Alexandria) will demonstrate the tongue in groove technique for nasal tip manipulation.

Each candidate will share a fresh frozen cadaver to dissect the nose in a step-by-step fashion, with staged demonstrations throughout the afternoon, and one specialist consultant supervising each table.

Individual supervised dissection with a structured open tip rhinoplasty dissection (two candidates per fresh cadaver nose)

14.00 Demonstration with forehead flap and nasolabial flaps

15.00 Demonstration of auricular cartilage grafting

18.00 End of FACE EYES NOSE 2016
